

Backyard ADVENTURES®
Peak Series Catalog

Welcome to Backyard Adventures

Welcome to Backyard Adventures

Thank you for including us in your search for a new play set! As you browse through our catalog, you'll focus first on all the things every parent holds dear – the safety features, the durable construction of our play sets, the variety of accessories and configurations, and the innovative value.

Families all over the world have found there's more to a Backyard Adventures play set than you might immediately notice. There's fitness and exercise, fresh air and time with friends, laughter and imagination, physical and mental development, learning and education. Most importantly, your experience at one of our dealer showrooms will bring to life all the benefits of owning a Backyard Adventures play set.

No catalog could possibly hold all the customized configurations available, so we encourage you to visit your local Backyard Adventures dealer. There, knowledgeable play set designers will work with you to customize the system that's right for your family, your budget, and your backyard.

At Backyard Adventures, we realize you have many choices when shopping for a new play set. We invite you to visit one of our unique dealer showrooms and experience the excitement for your family. We genuinely appreciate that you've included us in your search, and we're confident that you'll ultimately choose Backyard Adventures...let the fun begin!

Peak Highlights

The Peak Series is loaded with some of our most popular accessories and is designed to adjust for relatively un-level yards. Peak play sets are constructed for parents and children to play together.

- Modular design
- Tarp and Wood Roof options
- Highest quality features
- Angled leg design accommodates the tire swivel swing
- Deck heights 6' – 8 1/2'
- Swing heights 9' – 10'
- Slide Lengths 12' – 14'

We've taken the best of our previous angled leg systems and combined them into the Peak. The new larger 6' X 6' deck size is huge, and the taller head room makes this a perfect play set for you and your children. You'll be amazed how much room you'll have while playing in one of our Peak forts.

The Peak series comes standard with our most popular climbing options: rock wall, chain ladder/flat-step ladder combo, and accessory arm with rope ladder. You also get a tire swivel swing and an accessory arm with trapeze bar with every Peak unit. Your local dealer will help you customize your unique design with swing beams, slides, monkey bars, and lofts.

When you compare our Peak Series to other angled leg swing sets, it's easy to see the incredible value we've built into our Peak play sets. No other similarly designed system will provide the same combination of play value, quality, reliability, and fun.

The Best of Backyard Adventures

• **Dealer service** – Your local dealer is the most valuable asset when choosing a play set for your family. Their friendly staff members are product experts, trained to teach you the most relevant information about selecting a backyard play set. Visiting a dealer is fun for the whole family, so take your kids and experience all Backyard Adventures has to offer.

1 Wood – Backyard Adventures uses all cedar wood, a premium lumber for outdoor use. Our cedar is free of toxic chemicals and certified to meet and exceed all ASTM standards for play set construction materials. Our lumber suppliers practice sustained forestry to ensure long-term renewability and a healthy environment. Our cedar is superior in strength and durability so your play set will last longer. Cedar is naturally resistant to bug infestation, rot, and decay

2 Flex walls – Our new flex walls represent Backyard Adventures commitment to innovation and simplicity. Now you can easily add new accessories anytime by simply removing a flex wall panel to create an activity zone.

• **Space savers** – Our space saving play sets and features create the most play value in small spaces. Ask your local dealer to design a space saving play set for your side yard or corner play space.

3 Compression clamps – The key structure joints on our Treehouse Series and many accessories are secured with compression clamps for incredible strength. Our compression clamps have tested twice as strong as traditional bolt-through joints.

4 Floor joists – Peak floors are built just like your house! Our floors are noticeably stronger, ensuring safe play for years to come.

5 Steel swing supports – The steel top plate and side strips are additional safety features against board failure.

6 Thick chains – Our exclusive ¼" powder-coated chains are noticeably thicker and stronger.

7 Safe slides – Our exclusive Rocket Slide is intelligently designed with high side walls and a safe exit so even your younger children can slide with confidence.

8 Flat ladder steps and hand rails –

All ladders are standard with flat steps and most with hand rails. This is always the safest way into a fort structure for children of all ages.

9 Adjustable height swing beams, monkey bars, and forts (Peak Series) –

Our play sets are designed for relatively un-level backyards. We offer many features that adjust to fit the unique contours of your landscape.

• **Safety grip chains** – The chains on our infant swings and toddler buckets are specifically designed for smaller hands.

10 **Heavy duty swing hangers** – Our commercial grade ductile swing hangers are the strongest swing hangers used on backyard play sets.

11 **High quality stain** – Our premium stain enhances the natural beauty of cedar and protects it from the elements.

12 **Marine rope (no splintering)** – Our rope is considered marine grade for outdoor use. It does not splinter like cheaper ropes so your little hands always have a secure, soft grip.

13 **Gusset supports** – Gusset supports at key structural joints lock pieces into place, eliminating unnecessary movement in the play set.

14 **Grab handles** – Grab handles are strategically placed around the play set to ensure a safe play experience for your children.

15 **Quarry Climbers** – These incredible rock climbing holds represent 18 of the most famous rock climbing places around the world, and were hand sculpted by professional rock climbers. Quarry Climbers have two sides for an easy or a more difficult climbing experience as your children grow.

• **Modular designs** – Backyard Adventures play sets are the most modular designs available. Visit your local dealer showroom to create a customized play set that's perfect for your family, backyard, and budget.

• **Engineered beams (timbers)** – Backyard Adventures uses engineered beams for major structural components providing additional strength and durability. Engineered beams experience less checking and warping than traditional timbers. Our engineered beams are built just like the ones used in many commercial and residential construction projects. Our timbers are fully tested for outdoor use and come standard with a life-time warranty.

• **Best warranty** – Backyard Adventures warranties lead the industry in providing total customer satisfaction. We stand behind every play set we put our name on so you can be confident in your choice to own a Backyard Adventures play set.
